

# How to reach Vorarlberg

## Getting around

Vorarlberg's public transport network is very well developed. No need to use your own car at all! Nearly every village can be accessed by train and bus, from early to late hours, with a remarkable range of connections to choose from. Railway and bus schedules have been smartly coordinated: when you change from one to the other, there is barely any waiting time. With public transport of such a high standard, getting to know a wide variety of villages and regions is a piece of cake.

All regions offer inclusive cards. Most of these cards double as tickets for public transport in the region and partly even beyond. Scheduled buses and ski busses operate in the winter sports region. Holders of ski passes and/or guest cards travel for free.
